TECHNICAL TRAINING COURSE ON CONCRETE REPAIR & PROTECTION

Parramatta NSW – 22 April 2020 – Full day course

ACRA's One Day Course in Concrete Repair & Protection offers the most comprehensive training yet available in a single day.

The updated course is the best independent information available to date for engineers starting out in the specialist area of concrete repair, contractors' supervisors and foremen, as well as those who just want some basic but detailed knowledge.

Asset managers, port and road authorities, councils and ACRA members should consider training their key staff by sending them to a session run around the country. Group bookings can be negotiated by request.

The course covers the following key topics:

- Concrete Properties**
- Causes of Concrete Deterioration**
- Site Investigations**
- Remedial and Protective Systems**
- Repair Specification**
- How to Do a Repair Properly**

The course stresses the importance of thorough diagnosis, covering the basics of concrete and its deterioration, followed by site investigation techniques and how to select an appropriate remedial or protective system.
